

PRESS RELEASE

INTRODUCTION OF PREPAID TOLL CARD

The Roads Fund Administration (RFA) would like to inform motorists and the general public that it has rolled out a prepaid toll card payment system.

The toll card system has been designed to enhance the road users' tolling experience by providing a fast, convenient and secure way for motorists to pay their tolls without the need for cash. All road users interested in using the toll card as a mode of payment will be required to register with the RFA so that they can be issued with a card. The cost of each card is **MK6,000**. The toll card will be valid for **three (3) years**.

Registration forms can be downloaded from the RFA website; www.rfamw.com or obtained upon request from RFA Head Offices at Ngerengere Building situated off Queens Drive, in Lilongwe or at Kalinyeke and Chingeni Tollgate offices, in Dedza and Ntcheu, respectively.

A toll card will be issued to eligible clients upon meeting the terms and conditions of registration within a period of **seven (7) working days** from the submission date of the registration form.

The prepaid toll card is one method of payment for tolls in addition to the cash and bank card payment systems. It is the RFA's expectation that the toll card system will ease toll payment transactions and reduce motorists' time to access the tollgates.

For more information on the prepaid toll card, please contact:
